## Wavian 'Smart' Spout with Bayonet Fitting

Rigid bayonet style 'Smart Spout' with dry break system – Red

JC00SMARTS

This special stub nose 'smart' spout uses a manual spring action to dispense fuel at a slower, more controlled rate. The dry break is an added safety feature that ensures no source of ignition can penetrate the can from the spout area. This spout is ideal for the filling of smaller tanks eg, chainsaws.

- Optimum flow is assured when using our spouts with our cans
- Special breathing channel provides steady, slug-free, pouring
- Each spout has an internal filter to protect charging tank from dirt and foreign bodies

Please note: Because of the Smart Spout's unique design we recommend its use only with our 5 & 10 Litre Wavian Fuel Cans.

At Green Valley, we take pride in delivering quality. Choosing our EU manufactured Wavian brand is a guarantee of a United Nations safety certified product. Put your safety first and buy Wavian.

Please note this spout is designed specifically to fit Wavian Bayonet Fuel Cans.

Wavian is a brand name of Green Valley Industrial Supplies. Unit A1 Ground Floor, Meridian House, Meridian Business Park, Norwich, Norfolk NR7 0TA. For more information call **01508 493 647** or email **sales@wavian.net**.
