

Hand Fuel Pump

SKU: MT-JCP9

Description

Designed for efficient fuel transfer, with the ability to empty a Jerry can in less than 35 seconds at full flow. Say goodbye to the cumbersome lifting and pouring into funnels, especially considering a full Jerry Can can weigh over 20kg. This pump is an ideal companion for various applications, including motorsport, boat refuelling, aviation, tractors, and machinery.

Key Features

- 1-meter long pipe for versatile reach
- Mesh filter on the inlet end for optimal performance
- Suitable for use with both petrol and diesel

Specifications

Weight: 2kg

Please note this pump is compatible only with Bayonet style fuel cans.
